

DEPARTMENT OF VETERANS AFFAIRS - STATEMENT OF WORK

Solicitation 36C10B26Q0417: VBA Benefits Dashboard Modernization

1. Background. The Veterans Benefits Administration (VBA) runs a legacy benefits-status dashboard built on ASP.NET Web Forms and SQL Server.
2. Scope. The contractor shall re-platform the dashboard as a React front end and Python (FastAPI) services on AWS GovCloud, migrate the reporting database to PostgreSQL, and deliver automated tests and a CI/CD pipeline.
3. Period of performance: a 12-month base period and two 12-month option periods.
4. Place of performance: contractor site (remote). No security clearance is required; personnel must pass a VA Tier 1 background investigation.
5. Key personnel: a technical lead and a senior full-stack developer.

SECTION M - EVALUATION FACTORS FOR AWARD

Award will be made on a best-value tradeoff basis. Factors, in descending order of importance: Factor 1 Technical Approach; Factor 2 Past Performance; Factor 3 Price. Factors 1 and 2 combined are significantly more important than price.
